

TRANSPORTATION NORTHWEST, USDOT REGIONAL UNIVERSITY TRANSPORTATION CENTER

UW Transportation Graduate Degrees: Master (9 or 12 Month) and PhD Programs in Three Focus Areas

Supplement your baccalaureate degree and study transportation engineering at the University of Washington. The transportation program is expanding within the field of civil engineering, and represents strong areas of interdisciplinary relevance involving many other academic units at the University, particularly in the fields of geography, law, psychology, business administration and urban planning. For more information or to apply, contact the CEE Graduate Advisor: (206) 543-2390 or ceginfo@u.washington.edu, or visit the website: <http://www.ce.washington.edu/index.html>. Application deadline is February 1.

TRAFFIC OPERATIONS

Vehicular and pedestrian traffic operations with a strong focus on ITS. For more information visit: <http://www.uwstarlab.org>.

FREIGHT AND LOGISTICS

Surface freight movements and port and terminal operations with a strong focus on freight mobility and security.

INFRASTRUCTURE CONSTRUCTION

Innovative approaches to infrastructure construction with a strong focus on Smart Infrastructure.

Financial Support with Internships, Fellowships, Teaching Assistantships, and Research Assistantships

Transportation Northwest (TransNow) supports students' tuition through partnering with the government and private industry to provide internships and fellowships to graduate transportation students. Examples of partnering agencies include the Washington State Department of Transportation, DKS Associates, and CH2M Hill.

TransNow also supports student teaching assistantships and research assistantships. Students advance their field experience through valuable training in the classroom and the laboratory.

For more information or to apply, contact TransNow: (206) 543-8255 or transnow@u.washington.edu, or visit the website: <http://www.transnow.org>.
